

ENVIRONMENTAL POLICY STATEMENT

Since the inception of the company, Liftec Lifts Ltd has developed their business such that it remains an environmentally conscious organisation that is fully committed to the effective use and recycling of sustainable, environmentally friendly materials and processes, wherever it is both possible and practical to do so

During this period, we at Liftec Lifts Ltd have forged a close relationship with our customers and suppliers with a view towards continually encouraging them to consider adopting a similar environmentally responsible approach. As such, under the direction and guidance of our company directors, together we are committed where possible to:

- Continued environmental improvements
- Using environmentally friendly materials and processes
- Using materials from sustainable sources of supply
- Protection of the environment and preventing pollution
- Effective waste management and material recycling
- Comply with applicable legal requirements and other requirements to which the company subscribes

In striving to achieve the above, we have provided the framework for setting and reviewing environmental objectives and targets, including the following:

Energy and equipment

Encouraging the use of energy efficient equipment and technologies, improving building systems and lighting
Encouraging the use of energy efficient and lowest impact methods of transportation

Chemicals

Wherever possible, to monitor and adopt the lowest impact chemicals and products that can be used without adversely affecting the quality of the products and services that we supply

Paper products and packaging

To recycle pallets and other transportation materials, wherever it is both possible and practical to do so
To encourage our suppliers to provide recyclable packaging and adopt returnable packaging methods
To recycle all paper based products and packaging

Waste

Before disposing of waste, Liftec follows the hierarchy of waste.
Liftec aims to re-use or recycle wherever it is possible and practical to do so, avoiding or minimising disposal
Where waste has to be disposed or removed from our premises, it is by responsible and licensed contractors.

Management commitment

The directors and management team are fully committed to the above statements and review the company's objectives and targets in relation to the above. The environmental policy and the environmental management system are reviewed at least annually and when an opportunity to improve is identified. As such, environmental factors are also routinely considered during decision-making processes wherever it is appropriate to do so.

This policy statement and any revisions made to it will be communicated by the most effective means to all staff and any other interested parties and it is available upon request.

Staff commitment

All persons working for and on behalf of Liftec Lifts Ltd are required to be committed to environmental awareness and environmental improvement where possible.

Signed:

Jeff Nokes
Managing Director, Liftec Lifts Ltd.
