

Lift Maintenance

PIZZAEXPRESS

One thing popular UK restaurant chains such as PizzaExpress have in common, along with an established reputation for good food, is the key approach to providing a first-rate dining experience, particularly during their busier periods. Consistent building management, including safe lift access for both guests and restaurant goods, plays a significant role in this.

Liftec Northern has held a regional maintenance and repair contract with PizzaExpress since September 2017. This contract serves a range of their restaurants across the North of England and Midlands.

Altogether, PizzaExpress has over 400 UK restaurants and provides a reputable service to thousands of diners.

Lift Maintenance

PIZZAEXPRESS

To keep in line with PizzaExpress' service dedication, our Rochdale-based engineers deliver quality standards across the 34 lift assets including 22 goods lifts, 5 passenger lifts, 3 platform lifts and 1 hoist lift.

As part of our contract, all Liftec service and out-of-hours visits are pre-booked across all sites. In addition to this, our on-site engineers use a Cloud FM app to log each visit, ensuring that the restaurants' lifts are serviced on time and continue to operate reliably.

Our Northern team continues to provide lift maintenance for PizzaExpress, following successful contract renewals.
